protective SCREENS

According to the WHO (World Health Organisation), Coronavirus mainly spreads through the air when an infected person coughs or sneezes. A protective screen or sneeze guard can be fitted to service counters desks and reception areas, serving as a physical barrier between staff and customers to minimise exposure to potential infection.

With social distancing ever-present in our working and personal lives, we provide simple but highly effective solutions for protecting staff and customers that fit in seamlessly with your daily tasks and procedures

We provide a range of transparent protective screens, all of which are made from 5mm PET. These fit seamlessly onto desks, work benches and counter tops providing protection where it is needed. They can be supplied with a full screen or with an access hole or cable slot. Free standing options are also available as well as bespoke solutions.

In addition, we have a selection of Sneeze Guards, ideally suited for usage in the retail environment. They are lightweight and can be assembled quickly to act as a temporary barrier. They can be branded with bespoke design incorporating your logo and company colours.

protective SCREENS

Made from 5mm PETG Plastic

Available in 3 styles:

Plain with straight bottom edge / with cable slot / with access hole

FREE STANDING SINGLE DESKTOP / COUNTERTOP

If you are looking for an alternative screen solution or require a bespoke service please get in touch with the Raphael Team as we are sure we will have a solution to suit!

hand sanitiser STATIONS

A key tool in implementing hand hygiene measures

In order to reopen, businesses must, amongst other things, provide adequate hand washing facilities, including hand sanitiser stations where washing with soap and water is not available or practical.

Our range of freestanding hand sanitiser stations offer a quick and easy way to bring hand sanitising facilities to your premises. They're made of a lightweight board, with plastic edging and are wipeable, so they're easy to keep clean. This is printed in full colour on one (or both) sides with your branding or specific hygiene message.

The sanitiser dispenser unit is automatic helping to keep the unit germ-free. It has a 1000ml capacity.

If you are looking for an alternative hand sanitising solution, please get in touch with the Raphael Team as we are sure we will have a solution to suit.

For full spec please visit www.raphaeldesign.co.uk/hand-sanitising or call **07770 424950**

All units require batteries and hand sanitising fluid, not included. Prices include delivery to one UK address and print to one side only. For multiple orders, please get in touch.

WALL MOUNTED HAND SANITISER STATION

Assembled size (mm): 300(w) x 650(h)

Sanitiser unit size (mm): 150(w) x 420(h) x 114(d)

All units require batteries and hand sanitising fluid, not included. Prices include delivery to one UK address and print to one side only. For multiple orders, please get in touch.

antimicrobial FILM

15 YEAR GUARANTEE

PROTAC ANTI-BACTERIAL FILM is textured polyester laminating film with a durable antibacterial additive. It offers reliable protection from mould growth and bacterial contamination, including MRSA, Streptococcus, E.coli, Salmonella and more.

Protac Anti-Bacterial laminating film is ideal for use in environments where hygiene is crucial, such as schools, nurseries, restaurants, cafeterias, hospitals, reception areas, lifts, pubs, and public doorways.

Protac Anti-Bacterial Film's textured finish gives it good resistance to abrasions. It is resistant to chemicals and many common household cleaners, allowing for ease of cleaning.

Protac Anti-Bacterial Film is a very high specification film with the anti-bacterial agents active within the film itself – not just added as a lacquered coating. When the film is wiped clean, the antibacterial properties remain – making Protac Anti-Bacterial Film the ideal choice for environments where cleanliness is essential.

As well as offering these Germ Free Antimicrobial pads, we can also provide the film by itself with installation, if required.

antimicrobial PADS

Floor VINYLs

Choosing a floor vinyl from us couldn't be simpler. If it's a durable, long-term option you're looking for, by combining two professional media together, we've created a suite of high-quality solutions for your business that are compatible with a vast range of flooring surfaces.

If you're in need of a great value short-term alternative, we can also supply basic stock vinyls and laminates. But please be aware that these products do not conform with R-rating safety standards and are not covered by insurance.

INDOOR HARD FLOOR VINYLs

Printed on Drytac Premium Polymeric, grey-backed vinyl. A grey backing prevents any show through from the floor, and the polymeric vinyl is anti-shrinking and comes laminated with an R10 safety anti-slip laminate. This is a premium product ideal for smooth floors. The perfect partner for tiles, painted floors, vinyl, and smooth steel. The lifespan of the product is 6-12 months.

CARPET & OUTDOOR CONCRETE VINYLs

High Grip (grey-backed) coupled together with Drytac R10 anti-slip laminate make the ideal vinyl for short pile office style carpets and carpet tiles, and smooth concrete/concrete slabs. The warranty on these products is 12 months. The adhesive could damage the top of carpet tiles if the vinyl is removed.

INSTALLATION

These are easy to install, provided that air is pushed out and edges are smoothed over. All surfaces must be clear of dust and debris, and the substrate has to be dry before fitting.

wall SIGNAGE

These are produced on foam board. Printed direct to the board, they come with double-sided tape to adhere to the wall with ease. Circular signs are 5mm thick and our square variety have a thickness of 3mm. These three-dimensional signs stand out in any workplace and are a great eye-height reminder to practise staying safe. 600mm signs are available from stock in three styles for the bigger workplace, such as a warehouse.

Please enquire if you require something larger. We can produce up to two metre circular signs and 3050mm x 2050mm printed signs.

All of our products can be personalised with your company logo and designed to specific sizes.
